

Test your Knowledge

1. When to use String vs. StringBuilder in C# ?
Use String to store value if you do not need to change the string whereas use Stringbuilder if you need to change string's value over time.
2. What is the base class for all arrays in C#?
The base Class is System.Array
3. How do you sort an array in C#?
By .Sort() method
4. What property of an array object can be used to get the total number of elements in an array?
By Length property
5. Can you store multiple data types in System.Array?
No we need to use List<object> for that
6. What's the difference between the System.Array.CopyTo() and System.Array.Clone()?
System.Array.CopyTo() copies the array to an existing array whereas System.Array.Clone() creates a new array but with the same values.
